## VIS Introduction / 介紹

Founded in 2019, VIS, the experimental education institution in Taipei, a metropolis rich in humanities, was at that time a dream realization of several enthusiastic educators. It mainly concerns the founders that the current education situation in which most students and parents find learning hard and frustrating and that many students are helpless, disappointed, and bored in traditional schooling. However, VIS believes learning can be interesting and profound. Moreover, through fun and practical experiences in an innovative and creative environment, students can take ownership of their learning. VIS was established for leaders and innovators in the next generation. We bring their focus to global affairs, and prepare them for world's top universities.

VIS 創始於 2019 年，當時幾位充滿熱誠的教育家實現了在臺北，這個人文薈萃的大都市，建立實驗教育機構的夢想。主要是有感於當前的教育現況，學生與家長大多覺得學習是辛苦、沮喪的，也由於這樣的思維，我們看到許多學生在傳統學習的歷程中充滿無助、失望及無趣。然而，我們相信學習不只可以有趣、深入，更可在充滿樂趣且實際體驗親自操作的歷程中，使學生成為學習的主人，在創新且充滿創意的學習場域中學習成長。VIS 成立宗旨是為了培養下一代的領導者和創新者，引領他們關注全球事務，並協助其進入世界一流大學做好準備。

## VIS Introduction / 介紹

Our courses cover a wealth of choices to motivate students, encourage them to explore their own interests, build their capabilities and strengths, as well as finding out the suitable subjects and fields. VIS is honored to hire talented and passionate instructors to stimulate students' curiosity and motivation, so that they can discover their personal highlights and achieve their individual goals. We are also authorized and recognized by the College Board in the US and the Partner Schools Global Network (PSGN) collaborated with British Council, to provide students a series of AP (Advanced Placement) courses and multiple electives to choose from. The AP program can be a bridge to universities around the world.

我們的學術課程提供了豐富多樣的選擇，激勵學生的學習動機，從而探索自己的興趣、能力專長以及適合自己的學科及領域。VIS 很榮幸能聘請到有才華，熱情洋溢的教育者來激發學生們的求知慾及學習動力，讓學生在學習的過程中，發掘自我特質，找到個人亮點，追尋屬於自己的專屬成就。我們也受到美國大學理事會（The College Board）和英國文化協會全球夥伴學校聯盟（PSGN）的授權認可，學生可從一系列的 AP 大學先修課程（Advanced Placement Course）和多元選修課程中選擇，藉此順利銜接世界各地的大學。

# History

## 歷史

VIS was founded by WICEA-betterworld lab. It is an international experimental education institution dedicated to providing highly intelligent and motivated students a global education environment.

VIS 由社團法人萬向國際文教協會（WICEA-betterworld lab）創立，是一所國際實驗教育機構，致力於為敏而好學和努力上進的學生提供全球化教育環境。

For profoundness and more insight, students are required to work with their own hands, think with their own mind, and search for appropriate solutions. When learning is combined with the actual environment and experience, students will have a chance to take ownership of their learning, and learning will naturally become interesting and practical. Adhering to this philosophy, we believe students can start from where they are located, cultivate their rational thinking and build a global-wide perspective, and finally be able to develop global competence. We believe that by guiding students to actively participate in class, promoting critical thinking, encouraging them to identify new problems and explore alternative solution, they will be motivated to further explore and develop their own potential.

學習的深化需要透過學生動手操作、自己思考、探詢適當的方式，當學習與學生所處的環境與經驗結合，學生將成為自己學習的主人，而學習就自然而然成為有趣且實用的。秉持如此的理念，我們相信由學生所處的環境出發，讓其具備理性思辨及開拓的全球視野，將能養成具備世界公民素養的人，我們相信通過引導學生積極參與課堂活動，培養批判性思維，並鼓勵面對新問題，探索新路徑，可以增進他們的學習。從而激勵他們進一步探索思考，進而開發自身的潛能。

# Founding Philosophy and Common Goals

## 創辦理念以及共同目標

### Philosophy and Goals / 理念宗旨

The philosophy and goals of VIS is to provide students with global education, to prepare them for their future studies and life, and to cultivate critical thinking, communication skills and teamwork ability.

VIS的理念宗旨是為學生提供全球教育，引領同學為他們未來的升學及人生做好準備，同時在學習的過程中培養批判性思維、對話溝通以及團隊合作能力。

### VIS Vision / VIS願景

The school's vision is to guide each student to motivate themselves and achieve the goal through problem-oriented/project-based learning (PBL) and learner-centered teaching approach.

VIS 的願景是通過問題導向 / 專案式學習 (PBL) 和以學習者為中心的教學方法，引導每位學生找到學習動機與學習成就。

## Our Philosophy / 辦學理念

### Core Concepts / 教育理念

**在地認同** - Local Identity

**理性批判** - Critical Thinking

**全球視野** - International Mindedness

**同理尊重** - Empathy and Respect

**行動實踐** - Practical Action

## Our Philosophy / 辦學理念

### Principles of Teaching Approaches / 教學設計原理

The principles of VIS teaching approaches are focused on "Individualized Learning", "Connection to the Adults", "Development of General Skills" and "Teacher as Designer". These four principles directly address the students' needs and prepare them for adulthood. Furthermore, these four principles require students to solve problems through cooperation. With group learning experience, learners can effectively acquire problem-solving methods and share their thoughts. These learning models are no longer implemented regularly in other schools. The concepts extend to all aspects of VIS campus life and are represented by all aspects, including small class teaching, facilities open to all, customized learning, comprehensive and diverse courses, project-based learning, the students' exhibition, and sufficient preparation time for the faculty to plan and prepare lessons on working days.

VIS 的教育設計原理著重於『個別化學習』、『連接成人世界』、『通識能力的發展』和『老師為設計者』。這四項原則直接針對學生的需求，為他們進入成人世界做準備。再者，這四項原理需要學生透過各種合作式的互動來解決學習問題，藉由小組學習的歷程，學習者之間可以有效的學習問題解決方法，並分享彼此的學習心得。這些是現今其他學校已經不再規律執行的學習模式，這些設計理念延伸到 VIS 生活的各個方面：小班制的課堂、開放式的設施、通過諮詢進行的個別化學習、綜合多樣性的課程、專案式的學習、學生的成果發表以及在工作日為教師團隊提供充足的教案規劃備課時間。

## Our Philosophy / 辦學理念

**Each teaching approach is explained as follows / 每項教學設計原理說明如下:**

### **Individualized Learning / 個別化學習**

Observing the students can help VIS teachers better understand the students. The teachers are committed to a learner-centered teaching approach and provide support as well as challenge to students. Through project-based learning, students can pursue new exploration, and constantly reflect on their own learning and growth. VIS also provides support in all aspects to students with special needs. Every VIS student can schedule regular one on one meetings with the college counselor and counseling teacher for joining focus groups, seeking academic support, and making their future plan.

VIS 老師們透過觀察了解學生，並致力於以學習者為中心的教學方法，從而給予學生支持以及挑戰。通過專案學習，學生可以追求自己探索新事物的熱情，並不斷反思自己的學習和成長。VIS 對於有特殊需求的學生提供各方面支持，每位 VIS 學生都可以和升學顧問及輔導老師，定期以建立團體、輔助學業以及規劃未來等目的個別晤談。

## Connect to the Adults / 連接成人世界

VIS students, through field trips, community services, and consultation with experts from outside the school, may connect their study in class with the world off-campus. The students regularly exhibit their creations in the professional exhibition space. The VIS facility has a unique "workplace" atmosphere similar to the real world. There are seminar rooms, group learning classrooms, project areas, the fully equipped maker space, extensive wireless laptops, and the public area displaying artworks and student works.

VIS 學生通過 VIS 外教學、社區服務以及與 VIS 外專家業師諮詢，將他們的研究與 VIS 以外的世界聯結起來。學生們定期創作作品，並在專業場域展示作品。VIS 設施本身具有獨特的「工作場域」氛圍，設有附透視窗的研討室、小組學習教室和項目區域、完整配備的創客工作室、普及的無線筆記型電腦以及展示藝術品和學生作品的公共區域。

## Development of General Skills / 通識能力的發展

All VIS students follow a rigorous curriculum. This is to lay the foundation for future success in university application and career. VIS has clearly stated the general expectations for all students academically. We also hope that students will enrich their knowledge, abilities, and skills. The students are expected to learn how to integrate body, mind and their course subjects. Evaluation is based on performance-- all students need to initiate their own projects, solve problems, present the survey results to communities, and complete personal digital learning profiles. Teachers use various approaches to guide different learners and let them understand the value of collaboration with students from different backgrounds.

所有VIS學生都遵循嚴謹的課程，為申請大學以及未來工作成就奠定成功的基礎。VIS 明確表達了對學習的普遍期望，希望學生充實知識能力與技能，學會如何將身心及學科融合。評估是基於績效的：所有學生都需要開發專案，解決問題，向社區小組展示調查結果，並完成個人的數位學習歷程檔案。教師採用不同的方法來帶領不同的學習者，並讓學生了解與來自背景各異的學生一起工作的價值。

## Our Philosophy / 辦學理念

### Teacher as Designer / 老師為設計者

VIS teachers are course designers. They work as an interdisciplinary team and design the courses they involved together. They are members of staff meetings and action groups responsible for solving various problems, as well as important decision makers in curriculum evaluation, professional development, recruitment and other important areas of the school. VIS respects teachers and gives the team sufficient planning time to design comprehensive projects, common evaluation criteria and shared ceremonies, where all students can show and introduce their project progress and research results to all.

VIS 老師是課程設計者，他們在跨學科團隊中設計他們所教授的課程。他們是負責解決各項問題的員工會議成員和行動小組，以及參與有關課程評估，專業發展，招聘和學校其他重要領域的重要決策者。VIS 尊重教師，給予教學團隊充足的計劃時間來設計綜合專案、共同的評估準則和共同的儀式，使所有學生都可以藉此展示介紹自己的項目進度及研究成果。

## Leave Application Requirements / 請假相關事宜

### Article 2 第 2 條

#### 5. Mental Health Days off 身心調適假：

Due to physical or mental health conditions that prevent attending classes, students may apply for a mental health day off. Each leave request should be in units of half a day or one day, with a **maximum of three days allowed per semester**. A leave request must be accompanied by proof of consent from a parent or actual caregiver. **Mental and physical adjustment leave does not apply during regular academic assessments or semester makeup exams.**

The responsible unit should regularly (e.g., weekly, bi-weekly, or monthly) compile and provide information on students requesting mental health day off to the Counseling Office for reference. Through the aforementioned plan, legitimizing mental health day off as a valid reason for leave helps students become more aware of their psychological state. It also encourages teachers and parents to pay more attention to and recognize the psychological condition and needs of the students.

因身心狀況不適致無法出席課程，得請身心調適假，每次請假應以半日或 1 日為單位，**1 學期以 3 日為限**，並應出具家長或實際照顧者同意之證明。**定期學業成績評量及學期補考期間，不適用身心調適假。**

學生請身心調適假之資訊，權責單位應定期（例如每週、每兩週或每月）彙整提供給輔導處（室）參考。透過前開規劃，讓身心調適成為正當的請假事由，有助於協助學生更覺察自己的心理狀況；也有助於促使教師、家長重視與覺察學生的心理狀況與需求。

### Grading / 評分標準

At VIS, the assessment philosophy prioritizes individual growth and authentic understanding over traditional grading. Authentic assessment, including projects and hands-on experiences, fosters real-world application of knowledge and skills. Our goal is to cultivate well-rounded individuals prepared for the challenges of a dynamic world. This course mixes traditional academic assessment and innovative project-based assessment. Assessments at VIS are graded against rubrics. Rubrics are documents that describe what your assessment (test, paper, project, or other deliverable) will need to show to get a certain number of points. The rubrics for each assignment are posted on the institution's Learning Management System in advance of each assessment. The teacher, as an expert in instruction & assessment, has final and absolute discretion over the grades assigned to students in this class.

在 VIS，我們的評量理念重視學生的個人成長與對於內容的理解，並不僅以傳統分數作為唯一衡量標準。我們透過真實性評量，包含專題、實作與實際應用經驗，幫助學生將知識與技能運用於真實情境中。我們的目標是培養具備全方位能力、能面對世界挑戰的學生。課程將結合傳統學術評量與創新之專題導向評量方式。VIS 的各項評量皆依據評分標準（rubrics）進行。評分標準是說明學生在測驗、報告、專題或其他學習成果中，需要展現哪些內容與能力，才能獲得相對應分數。每項作業或評量的評分規準，皆會於評量前公布於 VIS 的課程系統中，供學生參考。任課教師基於其教學與評量專業，將依據課程目標、評量標準（rubrics）及學生實際學習表現，綜合評估並決定學生於本課程中的成績。

### Courses and Teaching / 課程與教學

VIS designs our courses according to the high school standard syllabus of Columbia International College (CIC) in Ontario, Canada, and VIS's own unique project-based learning program (PBL). Our curriculum planning allows students with expertise and special talents to retain their enthusiasm for learning, meet their individual needs, encourage them to express themselves, and develop according to their own interests. The primary, experimental philosophy of VIS is "learning by doing". We continue to cultivate students' independent thinking, and prepare for the world's top universities.

VIS使用夥伴學校加拿大安大略省哥倫比亞國際學院（CIC）的高中標準課綱，以及 VIS 自己獨特的專案式學習課程（PBL）。我們的課程規劃讓有專長及特殊才能的學生保有學習的熱情，滿足學生的個性化需求，鼓勵他們表達個人意見，並讓他們按照自己的志趣來發展。VIS 的實驗理念是將『做中學』放在首位，持續培養學生獨立思考的能力，並為進入世界頂尖大學做好準備。

### Project/Problem-Based Learning / PBL 專案/問題導向學習

The VIS Interdisciplinary Project-Based Learning (PBL) Program in Senior High builds on the foundational skills developed in Junior High, guiding students from structured interdisciplinary projects in Grade 9 toward fully independent, self-directed projects by Grade 12. As students' cognitive abilities develop, there is a deliberate shift from teacher-supported learning to increased autonomy, with a focus on abstract thinking, critical analysis, and real-world application. Students engage in complex, interdisciplinary projects that require advanced research, problem-solving, and collaboration, while also developing leadership, self-management, and reflective practices.

VIS 高中部跨領域PBL專案 / 問題導向學習課程，建立於國中階段所培養的基礎能力之上，引導學生從九年級較具結構性的跨領域專題，逐步發展至十二年級完全自主、自我導向的專案學習。

### Project/Problem-Based Learning / PBL 專案/問題導向學習

The program emphasizes transferable skills, encouraging students to apply knowledge across disciplines and in unfamiliar contexts, preparing them for the demands of higher education and future careers. Learning is enriched through authentic experiences such as fieldwork, industry connections, engagement with external experts, and participation in program-wide PBL exhibitions, where students communicate and justify their learning process, decisions, and iterations to an authentic audience. By Grade 12, students demonstrate full independence in designing, managing, and evaluating their own interdisciplinary projects, ensuring they are adaptable, resilient, and prepared for lifelong learning in an evolving global landscape.

### Homeroom / 導師時間

Homeroom at VIS is a program that helps build study skills, connect with VIS culture, and build relationships with peers and teachers.

Homeroom functions as a structured seminar and workshop that supports the interdisciplinary PBL program by creating space for deeper exploration, skill development, and community engagement.

Students and teachers use this time to engage with readings, videos, discussions, and short activities that strengthen understanding of how subjects connect to each other, the driving questions of their projects, and broader frameworks such as the United Nations Sustainable Development Goals (SDGs).

VIS 的導師時間，能協助學生培養學習技能、融入 VIS 文化與教育理念，並且幫助同學與導師建立良好關係。

導師時間（Homeroom）以結構化的研討與工作坊形式進行，並作為跨領域 PBL 課程的重要時段，提供學生更深入探索、技能培養及社群交流的機會。

學生與教師會利用此時段透過閱讀、影片、討論及小活動，深化對學科間連結、專題核心問題，以及聯合國永續發展目標（SDGs）等整體架構的理解。

### Homeroom / 導師時間

Homeroom also includes dedicated teaching and student-led sharing blocks for the development and exchange of knowledge and skills, as well as time for students to build and curate their portfolios. As the first session of the day, it serves a practical role for announcements and coordination of school-wide initiatives, including student council activities and student-led conferences, while also supporting end-of-semester presentations of learning. When needed, Homeroom may extend into PBL work time to ensure students can meet project expectations and learning objectives, and it may also be used by the VIS Well-Being team for targeted sessions or seminars that support student development.

導師時間亦包含教師指導與學生分享時段，讓學生能發展並交流知識與技能，同時規劃與整理個人學習歷程檔案。作為每日的第一節課程，導師時間也負責 VIS 各項事務公告，包括學生會活動、學生主導之親師生晤談會議以及學期末學習成果發表等相關安排。

在需要時，導師時間亦可延伸作為 PBL 專案工作時間，以協助學生完成專題要求與學習目標。此外，VIS 學生關懷支持團隊也可能於此時段安排相關課程或講座，以支持學生的整體發展。

### **SDGs: Sustainable Development Goals of United Nations / SDGs 聯合國永續發展目標**

"Transforming our world: the 2030 Agenda for Sustainable Development" including its 17 Sustainable Development Goals (SDGs) and 169 targets was adopted in 2015 by Heads of State and Government at a special UN summit. The agenda integrates in a balanced manner the three dimensions of sustainable development- economic, social, and environmental; and provides a shared global vision towards sustainable development for all by identifying the common issues that the world currently faces. At VIS International Experimental Education Institution, all curriculum design, event planning, and student associations orient around UN's SDGs. Students are also expected to explore the SDGs and take further actions based on their own individual understanding.

### SLC-Student Lead Conference / 以學生為主導的親師生晤談

SLC (Student Lead Conference), is a VIS-exclusive conference for meetings with students, parents and teachers. The agenda is arranged by the student and the meeting is also chaired by the student. The student has to share their learning status and discuss the progress. SLC is a PBL-style meeting. Such meetings in other schools are held by teachers and students, and the students are just the attendees. The PBL-style meeting is led, chaired and hosted by the students. VIS would like to let the students review their performance, take the initiatives to improve and set their goals.

VIS 首創以學生為主導的會議 SLC (Student Lead Conference) 是與學生、家長和老師進行晤談的會議。學生需事先預備並在會議中主導整場會議的進行，分享他們的學習內容並討論進度。SLC 是一個 PBL 風格的親師生晤談，一般的親師會是由老師和家長討論，而孩子只是在一旁陪同，PBL 式的親師生晤談則是由學生主導，學生們必須準備好想談論的議題，並帶領整個晤談。VIS 此規劃之目的是讓孩子們反思自己的表現並設定改善及進步的目標。

### Learning Assistance / 學習協助

After-class Help Desk sessions are provided free of charge to support student learning. These sessions are not formal classes; instead, teachers from different subject areas rotate on duty in designated classrooms to offer academic guidance and support. Students may attend voluntarily based on their individual needs to ask questions, review course content, seek homework assistance, or discuss learning strategies. Students may also be recommended or assigned by teachers to attend for purposes such as make-up assessments, assignment corrections, or completion of missing assignments, with guidance provided during the session. The Help Desk also provides a quiet and supportive study environment where students may engage in independent reading, review coursework, or focus on academic tasks. The program is designed to foster a positive and collaborative learning atmosphere that encourages student growth and responsibility.

課後設置無需付費之課後學習輔導（Help Desk）時段，此時段並非正式課程，而是由各學科教師依領域輪值進駐指定教室，提供學生即時的學習諮詢與指導。學生可依自身需求自由前往，針對課業內容、作業疑問或學習策略提問與討論。若學生因補考、考卷訂正或補繳作業等學習需求，亦可能由任課教師建議或安排參與該時段，並於教師引導下完成相關學習任務。課後學習輔導時段亦提供一個安靜且支持性的學習環境，若學生有自主閱讀、複習課業或專注學習的需求，皆可彈性使用該空間，營造正向且互相支持的學習氛圍。
